

Life Extension Check-Up

Dear Patient:

"**Special Caring Creates Miracles**" at the *Life Center* for Health while you experience proven, new and affordable treatments. You deserve to look and feel special. This **New Year** is your opportunity to create a positive forward committed step towards excellent health.

You have been missed at the Life Center and I am making a commitment to assist you in gaining and maintaining excellent health this New Year. I am experiencing great results with patients just like you with new advances and proven methods of natural medicine in healing with my **Life Extension Check-UP Program**. You probably know of someone who has lost his or her health, possibly even someone you knew has died an early death since I've seen you last. It is now your opportunity to take an active role in making new choices to secure your future. Take your next step to insure excellent health this coming new year. Memorize the following statement and **ACT NOW**:

*"An ounce of **prevention** is worth a pound of cure."*

I enroll you to participate in my **Life Extension** Program that could **Save Your Life!** You may be letting your health get in your way of living your life the way you dreamed it could be at this time. Again, I am making a commitment to you that I will assist you in resolving any health concern you may have. We can work together to make it happen. To do so, please answer the following analysis in your mind making notes as you read along so we can go over them **together**. Grab a pen and **seriously analyze** these questions. Your life may be on the line:

- **How healthy** do you really want to be?
- What is your **key frustration** regarding your health?
(Things like back pain, headaches, insomnia, and fatigue. Even **any persistent** aches or pains, overweight, allergies, digestive problems, raised cholesterol, skin problems or hormone imbalances? There are easy, proven effective and safe programs for each of these problems.)

- How is your health affecting you current **lifestyle**?
- What health or **emotional** condition causes you the **greatest frustration** in life?
- With improved health, what would you like to do that you have not been able to do lately?

Some people believe they are beyond assistance. That may be your reality, however you deserve the good life. If you are open for other possibilities, let me tell you a couple of miracle cases recently that may change your perspective because you or a loved one may deserve a miracle also.

After being in practice for over twenty years I have enough case studies to write a book. However, let me just share three recent miracle cases at the Life Center for Health:

Miracle Case #1

John was brought into my office by Cher. He had multiple health problems; one of them being "sleep apnea." He would stop breathing for long periods of time and this happened many times throughout the night. After examination and consultation he received a *Ross Righting Reflex* adjustment. That night Cher could hear him sleeping comfortably throughout the entire night without any problems and has not stopped breathing during the night since his first adjustment. A miracle case indeed, cured with one special cervical corrective adjustment that opened up the nerve supply to his diaphragm muscle. You see the diaphragm receives its nerve supply from C-4 nerve in the mid-neck. I was able to determine exactly where that stress was in his spine with my special spinal examination. Nerves give life to our body. You cannot be healthy with stress on your brain and spinal cord nerves. Nerve function is one of the miracles of life. You deserve to get all your nerves checked by me so we can work together to relief the stress and turn on ALL the power from your spine up to your brain. That's my specialty!

Miracle Case #2

Pam, from Denver had received one of my "**Save Your Life**" CD's that are distributed **FREE** to everyone from the Life Center. While listening to the healing information on the CD she suddenly realized her ailing mother could receive assistance from one of the many special healing techniques that I developed. Pam received that feeling when I talked on the CD about a condition I call a "*Hialta Hernia*," which is a nerve problem with the stomach and diaphragm. Pam drove from Denver and brought her sick mother into my office from Northern California. Upon a careful examination and consultation I learned that in a recent visit to the emergency room her mother had almost died. Just prior to the hospital incidence she could not keep any food or liquids down and was constantly throwing up. Her heart had become irregular and almost stopped beating. In addition she had not been sleeping very well for many years because of this chronic stomach problem. She had become so weak she had experienced a recent falling accident. Well, after the examination I diagnosed a "*Hialta Hernia*," which is also called "acid reflex." She received a special *Ross Righting Reflex* adjustment from me, which corrects the *Hialta Hernia* problem through a series of nerve reflex techniques that I developed

and immediately her diaphragm started working perfectly again. She could breath freely for the first time in years. Pat took her mother back to the motel where she laid down on the bed until dinner was warmed up. Her mother fell fast asleep and slept on top of the bed with her cloths on through the night until 7:00 am the next morning. She hadn't slept through the night for years. She enjoyed her breakfast with absolutely no stomach problems what so ever. She was another miracle case. She returned to the office the following day for a follow-up visit before returning home to Northern California. Her cheeks were rosy red and she said with a beaming happy smile, "Dr Ross, I want another one of those same treatments I received yesterday. I feel wonderful again." That all happened with one of my special Ross Righting Reflex corrective adjustments.

Miracle Case #3

Bill had a routine blood test for his Life Insurance examination showing his Triglycerides high, which is the leading sign of pending cardiovascular disease. I immediately put him on my easy to follow Save Your Life Nutrition program follow nutrition program and recommended the famous Natural **Herbal Cleanse program**. He was skeptical, as many patients are that natural medicine is really going to work. Can changing one's diet and doing a simple herbal *cleanse program* work? I told him to do the program and then get rechecked by the Life Insurance doctor. I told him the alternative was to take the cholesterol-lowering drugs livitor, which gradually kills my liver. This life insurance examination was Bill's wake-up call, which could save his live from a future heart attack. After following the program and finished the '**liver flush**' he returned to the medical doctor for a follow-up blood work test. The following documented lab test results revealed dramatic changes had occurred for the better. His life was saved.

Bill's initial blood test results:

Date: 7-2-2002 - Triglycerides 185.

After just **ONE MONTH** look at the test results:

Date: 8-7-2002 - Triglycerides **66**

You deserve a 65% drop in Triglycerides. It was a miracle. You can read many more testimonials on my web site at www.DrRossDC.com and click "testimonials."

You or one of your loved ones deserves to be the next miracle case published to the entire world on my web site. (Note: Testimonial sheets available from my front office. Miracles cases receive a special health gift.)

You deserve to be checked for any stress, pain, fatigue or insomnia. **Make time to be checked right now.** Take advantage of this special opportunity to get a professional evaluation with my Life Extension program. Your health is to precious to put off another minute.

The check-up is **FREE**. Now what's your excuse?
